SKILLS

PROGRAMMING

Good:
• Python • javascript/node
Frontend:
• React.js • Redux • Knockout
Shell:
• Bash • Zsh
Familiar Databases | Basic
• MongoDB • Redis
Familier hosting and services:
• AWS lambda • S3 • EC2
• DigitalOcean
OS:
• Linux(comfortable) • MacOS

ACTIVITIES

PyBelgaum | Wrapping a json API
• Speaker
• Gave a talk on my project about how to write api client of a rest api and packaging it in python.
Startup weekend Vishakapatnam
• Speaker
• Helped some startups implement their ideas
Achievement
• Qualified for Google Code Jam 2014

INTERESTS

• Going to tech conferences.
• Going to open mics.

EXPERIENCE

KITSUNE | Web developer
July 2017 – Present
• I wrote a project - webform from scratch and started providing services for it's initial customer base.
• I designed an architecture for a project that used react and redux as base and was used to create a browser based IDE (kitsune IDE).

NOWFLOATS | Software Developer
June 2016 – Present
https://manage.nowfloats.com
• Worked on an MVC knockout dashboard.
• Added payment gateway to the dashboard system. Instamojo (Indian payment company).
• Facebook and Twitter signin to fetch access tokens for posting on behalf of users.
• Migrating some codebase from .NET/knockout to react/redux.

SORMEN SOLUTIONS | Startup | Intern
December 2015 – Feb 2016 | Singapore | Remote-work
• Crawled Singapore university websites for the courses they were providing. Wrote a django app with Google and Linkedin sign-in authentication.

OPENHATCH | Open Source Contributor | Django Project
Dec 2014 – April 2015

• Wrote documentation for version control and git. Learnt python and django by myself and contributed to the project using github.

OPENSOURCE | My opensource contributions
https://resume.github.io/?arindampradhan

NOWFLOATS HACKATHON | Product Competitor Visualizer
http://arindam.flatmateshq.com/Team-dubhacks/
November 2016
• Idea: Visualize market competiton of a product from SMEs nearby area and in online presence.
• Technologies Used: D3.js, Angular as Frontend. Nodejs and Python as backend and Nginx, algolia and ec2 instance in development.
• My responsibility: Backend and Devops.

PROJECTS

WEBFORM | Serverless form builder
https://dashboard.kitsune.tools/
• MVP - A form builder that generates javascript code so that you put in your website without much coding knowledge. Similar to google forms.
• Technologies Used: React, Redux and Webactions (database wrapper).

MICROSERVICES AND TOOLS | Using AWS lambda and S3
• Implemented cc avenue and instamojo payment gateway using AWS lambda(cost efficient). Framework used - zappa, flask
• Wrote a sublime text editor plugin to sync project files to AWS S3.
