SKILLS

PROGRAMMING
Frontend:
• React.js • Redux • javascript
Backend:
• Python • javascript/node
Familiar Databases | Basics
• MongoDB • Redis
• PouchDB • Firebase
Familier hosting services:
• EC2 AWS lambda • S3
• DigitalOcean • Cdn • ECS
OS:
• macOS(Comfortable), Linux

ACTIVITIES

PyBelgaum | Wrapping a json API
• Speaker
• Gave a talk on my project about how to write api client of a rest api and packaging it in python.
Achievement
• Qualified for Google Code Jam 2014

INTERESTS

• Going to tech conferences.
• Going to socials and concerts.

EXPERIENCE

RUBIQUE | Website | Senior Software Engineer
Oct 2017 – Present
https://www.rubique.com/
- Managed project and design needs with the design team.
- Migrated the project from a php/jquery site (http://testing.rubique.com/) to a react/redux site (https://www.rubique.com/)
- Wrote the entire project architecture from scratch.
- Taught all the devs about react and redux.
- The project is a large scale project with 6 Devs, 2 Designers and a PM.
- Implemented PWA, Adaptive design and SEO for the website and made the app work offline.
- Deployment using docker with ECS, with nginx as load balancer.

NOWFLOATS | UX Developer
June 2016 – Sep 2017
https://boost.nowfloats.com
- I wrote a project - webform from scratch and started providing services for it's initial customer base.
- I designed an architecture for a project that used react and redux as base and was used to create a browser based IDE (kitsune IDE).
- Added payment gateway. Instamojo (Indian payment company).
- Facebook and Twitter signin to fetch access tokens for different user privilages.

INTERNSHIP AND PROJECTS

SORMEN SOLUTIONS | Startup | Intern
December 2015 – Feb 2016 | Singapore
- Wrote a crawler for Singapore university websites for to gather the courses data they were providing.

OPENSOURCE | My opensource contributions
https://resume.github.io/?arindampradhan

NOWFLOATS HACKATHON | Product Competitor Visualizer
https://arindampradhan.github.io/Team-dubhacks/
November 2016
- Idea: Visualize market competiton of a product from SMEs in nearby area.
- Frontend: D3.js/Angular, Backend: python/node, Architecture: Algolia/nginx/ec2.
- My responsibility: Backend and Devops.

WEBFORM | Serverless form builder
https://dashboard.kitsune.tools/
- MVP - A serverless form builder that generates javascript code so that you put in your website without much coding knowledge. Similar to google forms.

MICROSERVICES AND TOOLS | Using AWS lambda and S3
- Implemented cc avenue and instamojo payment gateway using AWS lambda(cost efficient). Framework used - zappa, flask
- Wrote a sublime text editor plugin to sync project files to AWS S3.
